

Are you looking for a cruising vessel with ultimate live-aboard comfort? One that's ready to fulfill your dreams of a lifetime? A full displacement trawler that is safe, sturdy, sea-worthy—large enough to handle the open seas—

handy and able enough to sneak into secure snug anchorages—with room to spread out, with spaces to stow all your favorite stuff?

Maybe it's time to take a closer look at the Great Harbour 47!

The Design Team for the Great Harbour 47 wanted to build upon the superior liveaboard features found in the Great Harbour 37 while at the same time creating an entirely new vessel, not just a bigger one. This meant not only improving on the existing living spaces found the GH37—the saloon, the galley, the master, the heads—but creating new space not usually found on trawlers in this class.

- **The Saloon** was stretched 24", making it 125% more spacious. The aft double doors were placed off center to starboard to allow for a roomy, "U" shaped settee to port, perfect for lounging and socializing. To starboard, a full length sideboard has been added with room for a 43" rear projection TV, stereo & DVD players, books, games and optional wet bar.
- **The Galley** was enlarged with more counter space and under & over counter storage. Opposite the galley is a built-in dinette with seating for six, making it a true "eat-in kitchen!"
- **The Guest Head** is now big enough to hold a home-style fiberglass bathtub/shower along with full width vanity. Opposite the head is a laundry containing an over/under washer/dryer tucked away in a locker.
- **The Guest/Study** is a versatile space—it can be designed solely as an office with desk and bookcases, or it can be an office/guest with desk, settee berth and upper Pullman berth (see drawing) or it can be a double stateroom with full sized double berth, side table and hanging locker.

- **The Master** has the same ensuite head found in the GH37 along with additional floor & storage space to starboard. Either a hanging locker (see drawing) can occupy this space or a vanity with mirror and seat. There is plenty of storage in the 12 lineal feet of hanging lockers, a pair of dressers and 4 oversized drawers under the full Island Queen.

The helm is has room to place all your electronics right at hand.

The Dining area (looking forward) is opposite the galley & can have a free-standing table & chairs or built-in dinette.

The entertainment center holds a 42" rear-screen TV, home theater sound system & still has room for your favorite books.

The Watch Cabin TM

Perhaps the most unique feature of the new Great Harbour 47, is her **Watch Cabin™** found directly aft of the Pilot House. The GH47 Design Team learned from feedback from GH37 owners that probably the best place to sleep at anchor is on the convertible settee in the Pilot House. Taking this a step further, they created a permanent cabin, complete with day head, true **Queen Berth**, dresser & hanging locker (see drawing). The Pilot House was essentially unaffected—her helm station and raised settee have remained the same. In order to provide rearward visibility aft while underway, a section of the forward **Watch Cabin TM** bulkhead swings up, allowing the skipper to see aft through the cabin's large double windows in the after bulkhead.

Deja Vu All Over Again

The first Great Harbour 37, "Hemisphere Dancer," was built to be used as a law office in Detroit, Michigan. The first Great Harbour 47, was built for a businessman who will operate from on board in Florida, the Bahamas & the Caribbean. Special additions include state-of-the-art satellite communications gear & the conversion of the second stateroom into a full-time office/library.

Other optional layouts for the 2nd stateroom include: a full-sized double berth, twin lower berths, upper & lower berths, desk with settee/berth (shown in drawing) or a studio/workshop. Some of these layouts require moving the washer/dryer to either the saloon (forward starboard corner) or to the master (aft starboard corner). Please inquire about your custom requirements.

Features

Based on her little sister, the Great Harbour 37, the **Great Harbour 47** shares and builds on many of her older sibling's proven features—

- **Burdonsome & seaworthy hull** designed by Lou Codega, N.A. & constructed of solid fiberglass
- **Twin diesel power** with twin skegs protecting the shafts, propellers & rudders
- **Full displacement hull** with firm bilges for stability, fine entry and rockered bottom for efficient operation at cruising speeds
- **Raised functional Pilot House** with excellent visibility, oversized chart flats & room for the entire crew to hang out
- **Protective Portuguese Bridge** with gate leading onto the foredeck
- **Roomy galley** with 22 cu.ft. refrigerator/freezer, space for full size household range & plenty of storage & countertop

The props, shafts & rudders are protected by load-bearing skegs—these triangulate with the keel, allowing the Great Harbour to remain upright should she dry out at low tide.

Conclusion

The builders of the Great Harbour 37 wanted to create the best liveaboard trawler in her class. The positive response from the owners and guests confirm the success of this effort. With the Great Harbour 47, the Design Team wanted to continue and expand upon this success, their goal being to make the **Great Harbour 47, the best liveaboard trawler in her class.** She has more living space & is a better value than any other trawler under 50'.

Specifications

LOA	46'10"
LWL	46'1"
Beam	15'6" (WL)
Draft	2'10"
Displacement	70,000#
Fuel	1,000 Gal
Water	500 Gal
Holding	200 Gal
Hull	Solid Fiberglass
Superstructure	Cored/Vacuum Bagged
Power	Twin 71 HP Diesels
Electrical Service	50Amp/240VAC
